

## Textcheck Certificate

---

Refnum:	19070113
Title:	Untitled document beginning: The risk/benefit ratio of using statins for cardiovascular (CV) primary prevention in elderly people has not been established.
Date:	2019/07/03

We hereby certify that Textcheck has checked and corrected the English in the manuscript named above.

A specialist editor with suitable professional knowledge (M.Sc. or Ph.D./M.D.) reviewed and corrected the English. An English language specialist subsequently checked the paper again. The first language of both editors is English.

Please direct any questions regarding this certificate or the English in the certified paper to: [certified@textcheck.com](mailto:certified@textcheck.com)  
(Please quote our reference number: '19070113')
