Title:	Device choice of internal fixation for stable femoral neck fractures in Elderly: Cannulated screw fixation versus helical blade Cephalomedullary nailing - Clinical comparison retrospective study
Date:	2024/02/28

We hereby certify that Textcheck has checked and corrected the English in the manuscript named above.

A specialist editor with suitable professional knowledge (M.Sc. or Ph.D./M.D.) reviewed and corrected the English. An English language specialist subsequently checked the paper again. The first language of both editors is English.

Please direct any questions regarding this certificate or the English in the certified paper to: certified@textcheck.com
