Refnum:	19030411
Title:	Defective viral genomes generated in H1N1-infected human mast cells provide critical danger signals for triggering the antiviral response via the IFN signaling pathway
Date:	2019/03/08

We hereby certify that Textcheck has checked and corrected the English in the manuscript named above.

A specialist editor with suitable professional knowledge (M.Sc. or Ph.D./M.D.) reviewed and corrected the English. An English language specialist subsequently checked the paper again. The first language of both editors is English.

Please direct any questions regarding this certificate or the English in the certified paper to: certified@textcheck.com
